

# Digital Developer

<b>Team</b>	Digital
<b>Salary</b>	Up to £39,665 per annum
<b>You will report to:</b>	Lead Digital Developer
<b>You will manage:</b>	N/A

The Digital Developer will support Stockport Homes Group's (SHG) digital transformation strategy and ongoing digital operations. In doing so, you will increase value for money on existing processes, resources, and IT systems by driving efficiency; as a Digital Developer, you will assist with improving the digital customer journey; and you will contribute to wider strategic initiatives to transform the lives of our customers.

The Digital Developer will play a critical role in producing digital solutions from contributing on initial discovery through to go live as part of a wider program of delivery. In this role you will work closely with Digital Innovation Strategists to identify opportunities by assessing technical feasibility of new ideas across a wide variety of business functions. Key tasks involve building, testing, and supporting Digital services using Robotic Process Automation (UiPath), automating through AI engines, Microsoft PowerApps, and Microsoft PowerAutomate.

## Your responsibilities will include:

- ✓ Contributing to requirements gathering and project planning activities.
- ✓ Designing automations and applications according to business requirements and technical limitations.
- ✓ Building automations and applications according to business requirements, solution design, and the Digital framework for delivery.
- ✓ Leading on testing, quality assurance, and deployment activities on Digital projects.
- ✓ Maintaining live digital automations and applications, including identification, diagnosis, and resolution of code, environment, and infrastructure issues.
- ✓ Contributing technical expertise to wider strategic initiatives to aid decision making.
- ✓ Encouraging a continuous improvement and learning culture within the Digital Team, and in SHG generally.
- ✓ Collaborating with technical and non-technical teams across the business to solve complex problems.
- ✓ Writing and maintaining effective project documentation. Assisting with process improvement within the Digital team.

## About you:

- ✓ 2-3 years' experience working in a software development role, ideally in the public sector.
- ✓ 1+ years' experience working as a Robotic Process Automation developer (UiPath preferred) or PowerPlatform developer.
- ✓ Experience working with the full software development life cycle from early discovery through to live support.
- ✓ Other related skillsets may be beneficial, including (but not limited to) IT support, systems management, data engineering, AI/ML, business analysis, UI/UX design, project management, etc.
- ✓ Strong problem-solving, analytical, and critical thinking skills.
- ✓ Takes the initiative and displays professional curiosity.
- ✓ Great communication skills, able to work effectively with technical and nontechnical
